NSW Ambulance Authorised Adult General Care Plan

NSW Ambulance Authorised Adult General Care Plans (AGCP) were developed to enable paramedics to provide individualised care to the patient, who requires specific treatment and/or transport to a specific destination. The AGCP will provide paramedics with the plan which has been developed by the medical practitioner in consultation with the patient and/or their person responsible. In order for the paramedic to follow the AGCP it must be endorsed by NSW Ambulance. If the AGCP is not endorsed, delay in the provision of the required treatment may result. Authorised Care Plans are only processed Mon - Fri (No Public Holidays)

Process for Endorsement

- 1. Form completed by the practitioner. All fields must be completed and legible. Failure to complete the form legibly will result in the plans being returned to the author.
- Completed form must be emailed to <u>AMBULANCE-AuthorisedCarePlan@health.nsw.gov.au</u> for NSW Ambulance Endorsement. ENSURE A VALID RETURN EMAIL IS PROVIDED AS NO PLANS ARE MAILED VIA POST. If your organisation currently operates Kiteworks secure file transfer system, email all completed plans via this platform. All other organisations continue to email completed plans via the normal emailing platform.
- 3. Completed form reviewed by NSW Ambulance and endorsed. If information is unclear or incomplete, clarification will be sought from the author and may result in processing delays.
- 4. Completed form with a covering letter will be emailed back to the address indicated on the form. (This can take up to 10 days), through the new secure transfer file platform -Kiteworks. To access completed plans if you do not have Kiteworks follow the below instructions.
 - Open the email invitation and click on the "Access message" button.
 - Your web browser will open and connect to the eHealth NSW Secure File Transfer portal
 - Enter your email address and click on the "Next" button and then set a password. Click "Create Account"
 - You can then start using the secure file service.
 - The endorsed authorised care plan will be required to be downloaded and printed within 14 days, after which the plan will be automatically deleted from the email system.
 - In addition to emailing endorsed Authorised Care Plans through the secure file transfer system, plans will now be password protected to increase the security of the information in the document and to ensure they are only accessible by intended receiver/s.
- 5. A copy of the endorsed AGCP will also be emailed to the medical practitioner.

N.B. please notify NSW Ambulance if the AGCP is no longer required or if the patient dies. AGCPs remain valid for 12 months, after this time paramedics may not be able to follow the plan.

Paramedics carry a limited supply of routine medications (see list below). If the patient requires other medications to be administered to help manage symptoms, these medications must be available in the patient's residence. Paramedics are not able to access medications that are in a locked medication safe in a residential aged care facility (RACF) if the registered nurse is not available.

Qualified Ambulance Paramedics						
Adrenaline	Aspirin	Benzyl Penicillin	Clopidogrel			
Compound sodium lactate	Droperidol	Enoxaparin Sodium	Fentanyl			
Fexofenadine	Glucagon	Glucose Gel	Glucose 10%			
Glyceryl Trinitrate	Ibuprofen	Ipratropium Bromide	Methoxyflurane			
Metoclopramide	Midazolam	Morphine	Naloxone			
Ondansetron	Oxygen	Paracetamol	Salbutamol			
Tenecteplase						
Advanced Life Support and Intensive Care Paramedics Only						
Amiodarone	Atropine	Calcium Gluconate	Frusemide			
Ketamine	Lignocaine	Sodium Bicarbonate
